## ABOUT US

Shenzhen Ogemray Technology Co., Ltd. is a national high-tech enterprise and a high quality smart lighting provider with independent cloud platform, smart lighting 5.0 era initiator and leader.

Founded in 2004, focusing on wifi smart control for 20 years. Creating the many patents of IOT industry, including SPLC, WIFI, BLE, BLE mesh and so on. Realizing wireless control locally or by cloud platform like Amazon, Google, Tmall and other third-party smart voice control platform. Smart,high efficiency as well as lowing costs are our pursuit.

Our Hardware products includes smart lamps,smart lamp controller, smart switch panel, wifi/ infrared socket and other smart home controllers.Our Service includes smart lamp product design, APP development, server deployment, platform erection, etc. We offer OEM/ODM for client's special projects.

Hope we can collaborate with more and more clients to create a convenient and Eco-environmental future for human.

## SW31 WiFi Smart Switch (1 Gang)

SW31 is a 2-way combination for 1 gang 16A smart relay switch, which provides energy management and better load capacity for powerful home appliance

The device allows you to power on or off your light/small home appliance anytime and anywhere without the need of any additional hub or controller. Great performance for monitoring power consumption to making your home more secure and convenient.

### Features

- 1.It could be installed in a wall mount to control high power electronic appliance at home;
- 2.Work with Amazon Alexa and Google assistant, control with your voice;
- 3.Patent WiFi access technology, users configure network one step intelligently by APP,Control lamps and appliance from anywhere by APP with WiFi/4G access;
- 4.Energy saving: Reduce energy use, eliminate wasteful standby power;
5. Power monitoring /Set schedule: Turn on/off your devices based on specific time you set
6. Multiple user control / Group control / Control history view

### Specifications

Parameters	Details
Data transmission	WiFi 2.4GHz
WiFi main chip	ESP8266
Flash	External 1M Flash
Measurement chip	HLW8032
Input voltage	90-240VAC
Rated current	16A
Rated power	3500W
ON/OFF control	1 Gang
Terminal dimension	30*14.3*10.3mm
Terminal spacing	7.5mm
Wire diameter range	12-24AWG 2.5m <sup>2</sup>
Resetbutton	1 PCS
Blue indicator	1 PCS
Dimension	40*40*20mm

## SMART SWITCH

# SW41 Smart Relay Switch

SW41 is a 2-way combination for 1 gang 30A smart relay switch, which provides energy management and better load capacity for powerful home appliance.

The device allows you to power on or off your light/small home appliance anytime and anywhere without the need of any additional hub or controller. Great performance for monitoring power consumption to making your home more secure and convenient.

### Features

1. It could be installed in a wall mount to control high power electronic appliance at home;
2. Work with Amazon Alexa and Google assistant, control with your voice;
3. Delay off time can be set to auto close the switch;
4. Set max time duration for automatic shutdown;
5. Energy monitoring, view electricity usage during a period of time;
6. Real-time power review / Control history view;
7. APP local and remote control / Group control / Multiple users control / Set schedule.

### Wiring Instruction

### Specifications

Wireless Control	WiFi 2.4GHz
Rated Voltage	240VAC
Max output power	For resistive load-4500W For inductive load-3000W
Application	Powerful home appliance
APP Support	Support Android6.0 and iOS11.0 or above
RF Range	30 meters indoors; 45 meters outdoors
Demension	60*48*23mm
Operating Temperature	-10°C~+50°C
Operating Humidity	20%~85% (No condensing)

Label	I/O	Description
L1	output	AC live line output, connect to lamp or small appliance
L	input	AC live line input
S1	input	Mechanical switch input to turn on/off L1
N	input	AC neutral line input

## SMART SWITCH

# SW86-1/2/3 Smart Touch Panel Switch

Works with Alexa/the Google assistant  
Works with Tmall Genie/DuerOS

the Smart Touch Panel Switch is mainly used for traditional lamps and small household electric appliance. It is used in conjunction with "Seetime Smart" APP offered to control devices anytime and anywhere, make life more safe and convenient. The device works with Alexa/the Google assistant/DuerOS/Tmall Genie.

### Features

1. Work with Amazon Alexa and the Google assistant, set name to every daughter switch, to control each sub-switch by voice command;
2. Patent WiFi access technology, users configure network one step intelligently by APP;
3. Remote control devices by APP /Group control /Multiple user control/Control history review;
4. Set schedule: Turn on/off your devices based on specific time ;
5. User-define scenes / Device interaction;
6. Support STA and AP work mode.

### Specifications

Model	SW86-1	SW86-2	SW86-3

## SMART SWITCH

## DLS01 Smart Switch

Using current WiFi control technology, our company independently developed the WiFi lighting switch, the WiFi lighting switch is mainly used for traditional lamps. It is used in conjunction with APP offered to turn ON/OFF devices anytime and anywhere, make life more safe and convenient.

The DLS01 WiFi lighting switch works with Amazon Alexa and the Google assistant, the WiFi lighting switch can be controlled via Alexa/the Google assistant voice service like ON/OFF control.

### Features

1. Work with Amazon Alexa and the Google assistant, control with your voice
2. Patent WiFi access technology, users configure network one step intelligently by APP
3. Remote control devices by App/Local control /Multiple user control/Group control/Control history view
4. Set schedule: Turn on/off your devices based on specific time you set

### Specifications

ON/OFF control	1 Gang
Data transmission	WiFi 2.4GHz
Input voltage	AC85-265 V
Rated current	5A
Rated power	550W@110VAC 1100W@220VAC
Dimension	66*30*23mm

## SMART PLUGS & SOCKETS

# SM40 Smart wifi wall switch and socket panel

The USB wall switch & socket panel is a WiFi smart device that supports USB fast charging and smart socket control, including 1 US/EU smart socket and 2 USB interfaces. No hub required, it could be applied to lighting devices or small appliances in the home. We can remotely control the sockets through the APP, supporting timing and countdown functions, and also viewing and managing electricity consumption. In addition, the smart device also includes two different types of USB interfaces, Type A and Type C, and supports 20W fast charging to support the application of various types of power supply devices for users, making life convenient and improving efficiency.

### Features

1. WiFi access technology, no hub required, fast connection, easy to control;
2. Work with Amazon Alexa and the Google assistant, control with your voice;
3. Support Local and remote control devices by APP with WiFi/4G access;
4. Support electricity metering, allowing users to view the electricity consumption during a selected time period through the app;
5. Including 1 US/EU smart sockets, Max current load 16A, supporting control high-power electrical appliances smartly and flexibly;
6. Including 2 USB interfaces, Type A and Type C, support 20W fast charging and cut off when fully charged automatically;
7. Including 1 physical button: short press to ON/OFF the switch socket, long press to reset the device to factory;
8. Support APP timing and countdown functions / APP real-time power view/control history view;

### Specifications

Product name	Smart US/EU standard USB wall switch & socket panel
Input Voltage	110-240V, 50/60Hz
Max Current	16A
Max Power	3500W
WiFi Frequency	2.4Ghz
AC outlets quantity	3outlets
Max USB charge	20W
USB A output ports	1 Ports
USB Type-C ports	1 Ports
Material	PC flame retarding polymer

## SMART PLUGS & SOCKETS

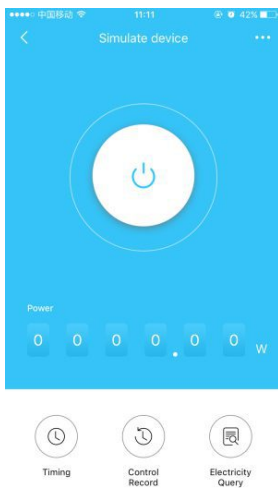

### SA01 Smart Plug

The SA01 smart plug should be used in conjunction with free Weconn Plug APP, the device allows you to power on or off your home electronics and appliances at anytime and anywhere, making your home more secure and more convenient.

#### Features

1. Easy to install and use , no hub required, support FOTA
2. Remote Control devices by APP with WiFi/4G access
3. Works with Amazon Alexa and the Google assistant, control your devices via voice.
4. Power monitoring / Energy saving: Reduce energy use, eliminate wasteful standby power / Plug control history view
5. Set schedule: Turn on / off your devices based on specific time you set
6. Multiple user control / Group control
7. Zero cross detection / Overload protection
8. Power and energy monitoring
9. Support FOTA

#### Specifications

Main chip	ESP8266
Data transmission	WiFi
Input Voltage	200-240V
Rated Current	16A
Max output power	3500W
Plug Output	Type I
Plug Input	Standard AU input plug
Material	PC flame retarding polymer
Fire rating	V0
Wireless Mode	WiFi
Wireless Standard	802.11 b/g/n
RF Range	30 meters indoor, 45 meters on open spaces. (changes with environment)
APP Support	Support Android4.0 and iOS8.0 or above
Dimension	62*110*35
Packaging Size	64*115*80

SA01

Works with  
Amazon Alexa

Amazon Echo

## SMART PLUGS & SOCKETS

### SF01 Smart Plug

The SF01 smart plug should be used in conjunction with free Weconn Plug APP, the device allows you to power on or off your home electronics and appliances at anytime and anywhere, making your home more secure and more convenient.

#### Features

1. Easy to install and use , no hub required, support FOTA
2. Remote Control devices by APP with WiFi/4G access
3. Works with Amazon Alexa and the Google assistant, control your devices via voice.
4. Power monitoring /Energy saving: Reduce energy use, eliminate wasteful standby power /Plug control history view
5. Set schedule: Turn on / off your devices based on specific time you set
6. Multiple user control / Group control
7. Zero cross detection / Overload protection

#### Specifications

Main chip	ESP8266
Data transmission	WiFi
Input Voltage	220V
Rated Current	16A
Max output power	3500W
Plug Output	Type C
Plug Input	Standard FR input plug
Material	PC flame retarding polymer
Fire rating	V0
Wireless Mode	WiFi
Wireless Standard	802.11 b/g/n
RF Range	30 meters indoor, 45 meters on open spaces. (changes with environment)
APP Support	Support Android4.0 and iOS8.0 or above
Dimension	62*110*35
Packaging Size	64*115*80

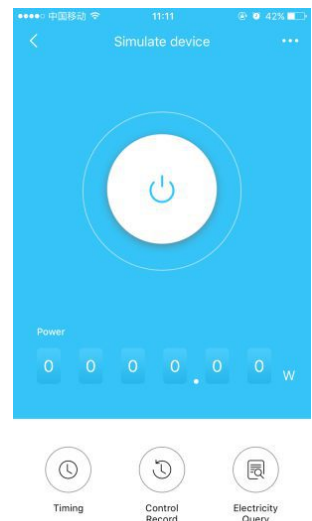

SF01

Works with  
Amazon Alexa

Amazon Echo

## SC02 Smart Plug

The SC02 smart plug should be used in conjunction with free Weconn Plug APP, the device allows you to power on or off your home electronics and appliances at anytime and anywhere, making your home more secure and more convenient.

### Features

1. Easy to install and use , no hub required, support FOTA;
2. Remote Control devices by APP with WiFi/4G access
3. Works with Amazon Alexa and the Google assistant, control your devices via voice.
4. Power monitoring /Energy saving: Reduce energy use, eliminate wasteful standby power / Plug control history view
5. Set schedule: Turn on / off your devices based on specific time you set
6. Multiple user control / Group control
7. Zero cross detection / Overload protection

### Specifications

Main chip	ESP8266
Data transmission	WiFi
Input Voltage	220-230V
Rated Current	10A
Max output power	2200W
Plug Output	Type I
Plug Input	Standard CN input plug
Material	PC flame retarding polymer
Fire rating	V0
Wireless Mode	WiFi
Wireless Standard	802.11 b/g/n
RF Range	30 meters indoor, 45 meters on open spaces. (changes with environment)
APP Support	Support Android4.0 and iOS8.0 or above
Dimension	62*110*35
Packaging Size	64*115*80

Amazon Echo

# SMART PLUGS & SOCKETS

## SE01 Smart Plug

The SE01 smart plug should be used in conjunction with free Weconn Plug APP, the device allows you to power on or off your home electronics and appliances at anytime and anywhere, making your home more secure and more convenient.

### Features

- 1. Easy to install and use , no hub required, support FOTA
- 2. Remote Control devices by APP with WiFi/4G access;
- 3. Works with Amazon Alexa and the Google assistant, control your devices via voice.
- 4. Power monitoring / Energy saving: Reduce energy use, eliminate wasteful standby power / Plug control history view;
- 5. Set schedule: Turn on / off your devices based on specific time you set
- 6. Multiple user control / Group control
- 7. Zero cross detection / Overload protection

### Specifications

Main chip	ESP8266
Data transmission	WiFi
Input Voltage	200-240V
Rated Current	16A
Max output power	3500W
Plug Output	Type G
Plug Input	Standard UK input plug
Material	PC flame retarding polymer
Fire rating	V0
Wireless Mode	WiFi
Wireless Standard	802.11 b/g/n
RF Range	30 meters indoor, 45 meters on open spaces. (changes with environment)
APP Support	Support Android4.0 and iOS8.0 or above
Dimension	62*110*35
Packaging Size	64*115*80

Works with Amazon Alexa

Amazon Echo

## SU02 Smart Plug

The SU02 smart plug should be used in conjunction with free Weconn Plug APP, the device allows you to power on or off your home electronics and appliances at anytime and anywhere, making your home more secure and more convenient.

### Features

1. Easy to install and use , no hub required, support FOTA
2. Remote Control devices by APP with WiFi/4G access;
3. Works with Amazon Alexa and the Google assistant, control your devices via voice.
4. Power monitoring / Energy saving: Reduce energy use, eliminate wasteful standby power/Plug control history view
5. Set schedule: Turn on / off your devices based on specific time you set
6. Multiple user control / Group control
7. Zero cross detection / Overload protection

### Specifications

Main chip	ESP8266
Data transmission	WiFi
Input Voltage	200-240V
Rated Current	16A
Max output power	3500W
Plug Output	Type G
Plug Input	Standard UK input plug
Material	PC flame retarding polymer
Fire rating	V0
Wireless Mode	WiFi
Wireless Standard	802.11 b/g/n
RF Range	30 meters indoor, 45 meters on open spaces. (changes with environment)
APP Support	Support Android4.0 and iOS8.0 or above
Dimension	62*110*35
Packaging Size	64*115*80

## SM01-IR Smart Plug

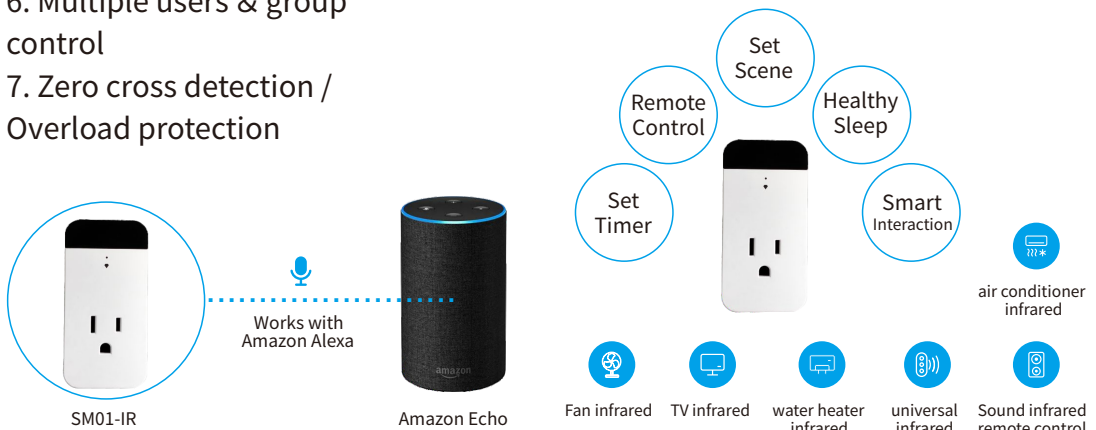

The SM01-IR smart plug allows you to power on/off your home electronics appliances anytime and anywhere, making your home more secure and more convenient. You can schedule the smart plug to automatically power electronics on and off as needed, like setting lights to come on at dusk or turn off at sunrise. Amazon Echo lets you control devices connected to the smart plugs using just your voice.

### Features

1. Infrared remote control, support most IR controlled air conditioners
2. Works with Amazon Alexa and the Google assistant, control your devices via voice.
3. Remote Control devices by APP with WiFi/4G access
4. Power monitoring /Energy saving: Reduce energy use, eliminate wasteful standby power /Plug control history view
5. Set schedule: Turn on/off your devices based on specific time you set
6. Multiple users & group control
7. Zero cross detection / Overload protection

### Specifications

Main chip	ESP8266
Data transmission	WiFi
IR Function	Yes
Input Voltage	100-130V
Rated Current	16A
Max output power	2000W
Plug Output	Type B
Plug Input	Standard US input plug
Material	ABS flame retarding polymer
Fire rating	V0
Wireless Mode	WiFi
Wireless Standard	802.11 b/g/n
RF Range	30 meters indoor, 45 meters on open spaces. (changes with environment)
APP Support	Support Android4.0 and iOS8.0 or above
Dimension	30*42*85mm

# SM03 WiFi Smart Plug

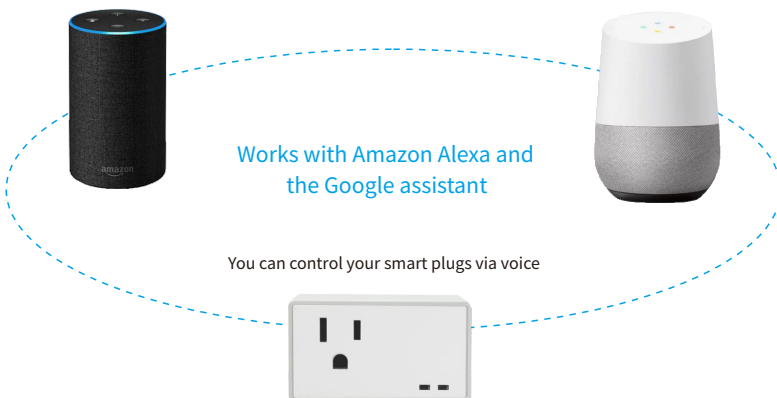

The SM03 smart plug should be used in conjunction with free "Seetime Smart" APP, the device allows you to power on or off your home electronics and appliances at anytime and anywhere, making your home more secure and more convenient.

## Features

- 1. Patent WiFi access technology, users configure network one step intelligently by mobile APP
- 2. Remote Control devices by APP with WiFi/4G access.
- 3. Works with Amazon Alexa and the Google assistant, control your devices via voice.
- 4. Set schedule: Turn on/off your devices based on specific time you set.
- 5. Multiple users & group control.

## Specifications

Main chip	ESP8266
Data transmission	WiFi
Input Voltage	100-130V
Rated Current	10A
Max output power	1300W
Plug Output	Type B
Plug Input	Standard US input plug
Wireless Mode	WiFi
Wireless Standard	802.11 b/g/n
RF Range	30 meters indoor, 45 meters on open spaces. (changes with environment)
APP Support	Support Android4.1 and iOS8.0 or above
Dimension	69.6*40.2*31.5mm

## SC03-IR WiFi Smart Plug

The smart plug should be used in conjunction with "Seetime Smart" APP, The device allows you to power on/off your home electronics appliances anytime and anywhere, set temperature remotely by transferring infrared signal, making your home more secure and more convenient.

Works with Tmall Genie/DuerOS Works with Alexa/the Google assistant

### Features

1. Infrared remote control, support most IR air conditioners.
2. Works with Alexa/the Google assistant/Tmall Genie and DuerOS, you can control device via voice command.
3. Set schedule and set timer to set temperature.
4. APP local and remote control
5. Energy monitoring, view electricity usage during a period of time/ Real-time power review
6. Group control & multiple users control
7. Zero cross detection

### Specifications

Rated Voltage	AC100-240V
Rated Current	10A
Max output power	2500W
Rated Voltage	Type I
Plug Output	ABS flame retarding
Fire Rating	V 0
Demension	67.19*43.19*34.00mm
RF Range	30 meters indoor, 45 meters outdoors

SC03-IR controls home appliances plugged in it, and it can also transfer infrared signal to remote control IR air conditioner to set temperature.

## SMART PLUGS & SOCKETS

### SU01-RE WiFi Range Extender with Smart Plug

Under using current WiFi technology. Ogemray independently developed new WiFi range extender and with smart plug. The device combine device control with range extender together. With free “Seetime Smart” APP, The device allows you to power on or off your home electronics and appliances at anytime and anywhere, making your home more secure and convenient.

#### Features

1. Expand WiFi coverage and reliability with smart plug function
2. Boost WiFi range, create a stronger WiFi signal.
3. Remote Control devices by APP/ Group control /Multiple users control
4. Works with Alexa/the Google assistant/DuerOS/Tianmao Genie, manage your devices via voice control
5. Power monitoring / Energy saving: reduce energy use, eliminate wasteful power.
6. Set schedule: Turn on/off your devices based on time you set.

#### Specifications

Data transmission	WiFi
Input Voltage	96V-264V
Rated Current	16A
Plug Input	Standard EU input plug
APP Support	Support Android4.1 and iOS8.0 or above
Dimension	98*56*40 mm

## EG003 Snap Button

Snap button is a new portable shopping device, it is a WiFi connected device, using it, we can order our favorite products with the press of a button. Each snap button is paired with a product of your choice. It can be placed in any place in any home. When you need to purchase, just click it and experience "one key to place order"

### Specifications

Data transmission	WiFi
Power supply	A rechargeable lithium polymer battery
Battery	3.7V 200mAh
Charging interface	Micro USB 2.0
Charging voltage	5.0V 200mA
Charging time	About one hour
Power consumption	Static power consumption in standby: <0.1mW Working power consumption: <10 joules / second
Number of operations	About 90 times under a single operating @full charge
Transmission distance	Interior: 50 meters, outdoor: 80 meters (varies with the environment)
APP Support	Android 4.0 and iOS8.0 or above
Dimension	52*52*10mm

### Features

1. Smartconfig technology, quick connection
2. Quick order place
3. Cancel order
4. One-button customer service
5. Regularly reported to work status
6. Rechargeable battery design

## EG016 Multi-key Button

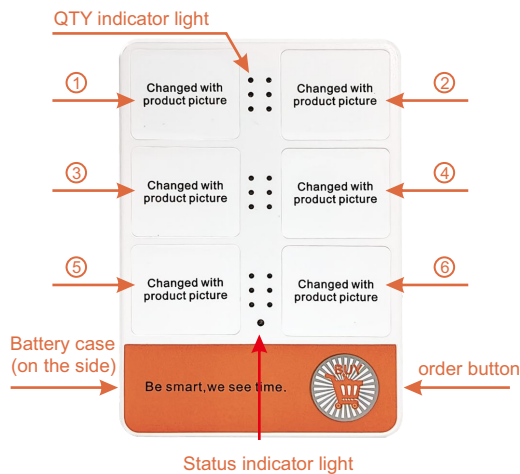

Multi-key button is a new portable shopping device, it is a WiFi connected device, using it, we can order our favorite products with the press of a button. Each Multi-key button is paired with the products and quantities of your choice. It can be placed in any place in the home. When you need to purchase, just click it and experience "one key to place order".

### Features

1. Smartconfig technology, quick connection.
2. Quick order place
3. Cancel order
4. One-button customer service

### Specifications

Data transmission	WiFi 2.4GHz
Antenna	Built-in antenna
Battery	2 pcs AAA batteries
WiFi Work Mode	STA mode
Security Mechanism	WPA/WPA2 — PSK/WEP
Connection Time	15-20 seconds
Power consumption	Static power consumption in standby: <0.1mW
	Working power consumption: <10 joules / second
Number of operations	About 90 times under a single operating
Transmission distance	Interior: 50 meters, outdoor: 80 meters (varies with the environment)
APP Support	Android 4.0 and iOS8.0 or above
Dimension	111.5x79x14mm

#### Note:

1. The device support more than 100 times completed order process. 2 pcs AAA batteries for power supply.
2. The transmission distance is 50 meters indoor and 80 meters outdoor, please pay attention to working distance.
3. When setup networking, your phone and the device mustbe in the same WiFi.

Remark:①-⑥ is merchandise chose button

## ZH002 Snap Call

Snap call offer fast and convenient shopping channel, optimize shopping experience to meet the need for prompt voice communication between users and vendors. Thus fix consumer buying habits to reduce possibilities to access to competitive products. In a word, the product enhances brand loyalty to help company expand competitive advantages and boost sales volume, thus improve profit and market

### Features

1. Smartconfig technology, quick connection with voice guidance.
2. Quick order place with voice communication
3. Support voice interaction for business and users
4. APP real-time message review and order review
5. Excellent battery performance, once fully charged, it can be used for 30 days.
6. Brief appearance design

### Specifications

Data transmission	WiFi
Power supply	5V/0.6A(Max)
Battery	1100mAh
Charging interface	Micro USB
Charging time	About two hours
Working time	30days@ battery is full charged
Power consumption	150mA+/-20mA (working mode) Less than 20uA(Standby current)
Connection time	3-15 seconds
MIC	Electret microphone, -42dB, 4015 gum cover added
Audio file format	Mp3
Max device recording time	15 seconds
Speaker	φ40mm 4Ω 3W inner magnetic
Output power	2W
Transmission distance	Interior: 45 meters, outdoor: 65 meters (varies with the environment)
APP Support	Android 4.0 and iOS8.0 or above
Dimension	78.6*78.6*42.3mm

## DK01 Smart LED Strip Controller

The DK01 should be used in conjunction with 5050 RGB LED strips and power adapter, with "Seetime Smart" APP, the device allows you to adjust color, brightness and dynamic effects of RGB LED strips anytime and anywhere, making your home more atmospheric and more convenient.

### Specifications

Applicable LED Strip	12V or 24V RGB LED Strip 0-48W within 10 meters
Recommended power supply	12V/3A or 24V/3A
Input Voltage	DC5-24V
Rated Power	48W
LED controller mode	RGB
Wireless Standard	WiFi 2.4GHz
Dimension	66.5*25*13.3mm (no wires and jack included)

### Features

1. Applied for 0~48W SMD 5050 RGB LED strip lights within 10 meters.
2. Works with Alexa/the Google assistant/Tmall Genie/DuerOS, adjust color/brightness/lighting scenes via voice command.
3. Change lighting scenes simply by a single press of the button
4. Multiple color and brightness control / Dynamic lighting effects control
5. Set schedule
6. Group control and Multiple users control / APP local and remote control

## SMART LED LIGHTING CONTROLLER

# DK03 High voltage light with controller

Dk03 is a high voltage light belt controller with Wi-Fi communication function and can control the heating and cooling, mainly for the high voltage light belt, it has 2 PWM driver circuits, respectively, used to control the cold and warm light belt (cold white and warm white lamp beads). The user can control the LED heating and cooling light belt through the mobile APP, including local control, remote control, timing control, scene control and some special effect control.

### Features

1. Add light control technology, brightness and color temperature can be controlled by double clicking switch (patented technology)
2. It is mainly suitable for 0-120W high-pressure cold and warm two color LED lamp belt within 50 meters
3. Support two PWM drive circuit, respectively, used to control 2 color LED lamp beads (cold white and warm white), to achieve warm and cold regulation /Dynamic lighting effects control
4. Support remote or LAN APP control

### Specifications

Applicable LED Strip	120W high pressure heating and cooling light belt
Power input	220-240V AC
Output voltage	200VDC
Maximum output power	120W for heating and cooling
Dimming range	6%-100%
Wireless Standard	2.4GHz-2.5GHz (2400M-2483.5M)
Dimension	79.5*49.5*24.0mm (excluding wire)
